The purpose of the Parks, Playground & Community Services Committee meeting was to discuss the potential location of the new bathroom unit in the Upper Park.

Engineer Zoldak and Service Director Blados used a large aerial view of the Upper Park to show the location options and corresponding issues of the placement of the new bathroom unit. Due to the size of the crane and the weight of the equipment, a previous location choice has been dismissed. The location of poles and tear up of already landscaped areas was also a factor.

The most logical location is closer to the parking lot which meets the requirements for the crane and equipment and is also closest to the necessary utilities. This location is good for safety reasons being more visible to law enforcement from the street and also convenient for anyone visiting the park. It will be in a neutral area between the ball diamond and the pickleball, basketball and playground areas. Additionally, this allows for future planning in the Upper Park. By not spending extra funds to place it in the rear of the park, it allows for a better quality bathroom unit with the grant funding. All were in agreement with the location.

There were no further questions and the meeting was adjourned.
