### Seven Ways Medicare Will Improve in 2019

Now 53 years old, Medicare has higher rates of satisfaction from its 60 million members than almost any other form of health insurance. It is about to get better. Here are seven improvements to Medicare that will take effect in 2019. Some of the changes will affect all beneficiaries while others will apply just to individuals who select Medicare Advantage plans.

**Donut hole** An expensive element of the Medicare Part D prescription drug benefit requires enrollees with high prescription costs to pay more for their medicines after they reach a certain level of spending in one year. This creates a coverage gap – also called the “donut hole.” After a beneficiary’s out-of-pocket spending reaches a second threshold, they enter catastrophic coverage and pay substantially less. Under the Affordable Care Act (ACA), the donut hole was scheduled to close in 2020. But the spending bill Congress passed in March will close the donut hole for brand-name drugs in 2019. The gap will close for generic drugs in 2020.

**Therapy cap gone** Beneficiaries of original Medicare won't have to pay the full cost of outpatient physical, speech or occupational therapy because Congress permanently repealed the cap that has historically limited coverage of those services.

**Better information** Medicare is updating the handbook it sends to beneficiaries every fall. It will include checklists and flowcharts to make it easier to decide on coverage. The online Medicare Plan Finder tool will be easier to use and an improved “coverage wizard” will help enrollees compare out-of-pocket costs and coverage options between original Medicare and Medicare Advantage.

**More telemedicine** Medicare is steadily broadening the availability of telehealth programs that let patients confer with a doctor or nurse via telephone or the internet. In 2019, it will begin covering telehealth services for people with end-stage renal disease or during treatment for a stroke.

**Lifestyle support** Beginning in January, Medicare Advantage plans have the option to cover meals delivered to the home, transportation to the doctor's office and even safety features in the home such as bathroom grab bars and wheelchair ramps. To be covered, a medical provider will have to recommend benefits such as home-safety improvements and prepared meals.

**In-home help** Medicare Advantage plans also will have the option to pay for assistance from home health aides, who can help beneficiaries with their daily activities including dressing, eating and personal care. These benefits represent a revised and broader definition of the traditional requirement that Medicare services must be primarily health related.

**Plan test drives** New regulations will let people try an Advantage plan for up to three months and, if they aren't satisfied, they can switch to another Medicare Advantage plan or choose to enroll in original Medicare. Congress required this flexibility in the 21st Century Cures Act, designed to accelerate innovation in health care.

01/23/19 Party on station reporting being threatened by co-worker; report taken.

Dear Village Residents,

**Turn your clock FORWARD on Sunday, March 10, 2019!!** The Brooklyn Heights Fire Department reminds you to change your smoke detector batteries as you reset your clocks to daylight savings time. The time changes in the fall and spring coincide with recommended battery life in a smoke detector.

As part of our ongoing effort to make certain that every village household has working smoke detectors, the fire department will accept any resident's request to have their smoke detector batteries replaced. **More importantly, if you do not have working smoke detectors or if they are ten years old or older, please buy one and we will install it for you.** If you would like to participate in this program, please fill out the form below and drop it in the payment box located to the left of the main entrance of our municipal building or mail it to 345 Tuxedo Ave. BH, OH 44131.

I will personally contact you to schedule a date and time.

With Safety in Mind

# Smoke Alarms at Home

**SMOKE ALARMS ARE A KEY PART** of a home fire escape plan. When there is a fire, smoke spreads fast. Working smoke alarms give you early warning so you can get outside quickly.

## SAFETY TIPS

- Install smoke alarms in every bedroom. They should also be outside each sleeping area and on every level of the home. Install alarms in the basement.
- Large homes may need extra smoke alarms.
- It is best to use interconnected smoke alarms. When one smoke alarm sounds, they all sound.
- Test all smoke alarms at least once a month. Press the test button to be sure the alarm is working.
- Current alarms on the market employ different types of technology including multi-sensing, which could include smoke and carbon monoxide combined.
- Today's smoke alarms will be more technologically advanced to respond to a multitude of fire conditions, yet mitigate false alarms.
- A smoke alarm should be on the ceiling or high on a wall. Keep smoke alarms away from the kitchen to reduce false alarms. They should be at least 10 feet (3 meters) from the stove.
- People who are hard-of-hearing or deaf can use special alarms. These alarms have strobe lights and bed shakers.
- Replace all smoke alarms when they are 10 years old.

## FACTS

- ❗ A closed door may slow the spread of smoke, heat, and fire.
- ❗ Smoke alarms should be installed inside every sleeping room, outside each separate sleeping area, and on every level. Smoke alarms should be connected so when one sounds, they all sound. Most homes do not have this level of protection.
- ❗ Roughly 3 out of 5 fire deaths happen in homes with no smoke alarms or no working smoke alarms.
