Healthy Trees for a Healthy Watershed

Trees have many benefits for communities and homeowners, including helping to slow and absorb rainwater. This helps to reduce the amount of stormwater that rushes off surfaces, and therefore reduces the amount of debris and pollutants that are carried to local water sources. Considering Northeast Ohio was covered in nothing but hundreds of years ago, it is easy to see the vast majority of trees have been eliminated as the area developed. Increasing the number of trees within local watersheds helps to achieve important goals, such as the reducing the occurrence and severity of flooding, which is one reason to make sure trees are planted correctly to maximize their benefits.

DON'T DROWN THE ROOTS!

Tree roots require water, oxygen and warmth to grow correctly. When tree roots are buried too deep under mounds of soil and mulch, the amount of oxygen and water that reaches the roots is reduced. A tree responds by sending the root system towards the surface to seek out oxygen and water. This requires the tree to work overtime just for basic needs and reduces the amount of energy used to develop a strong root system.

Some trees in this situation are able to develop normally over time, while others have a shorter life span and can suddenly die during wind or ice storms. Not only do we lose these trees that provide stormwater benefits, it can also add to the amount of woody debris that enters our waterways, causing damming and erosion of streams. Furthermore, unhealthy trees with shallow root systems do not promote the absorption of water into the ground as well as healthy trees with deep root systems, which provide a better pathway for water to filter into the ground.

For more information about correct tree planting methods, visit Ohio Department of Natural Resources (ODNR) Division of Forestry.

DO YOU MAKE THESE COMMON BICYCLING MISTAKES?

Riding on busy Sidewalks
It’s inconsiderate ..not to mention dangerous. In every city that has analyzed bicycle crash rates on sidewalks & roadways, the sidewalks were found much more dangerous. Ride in the street with the rest of traffic.

Riding “No-Hands”
Some bicyclists think this shows how skillful they are. Actually, all it really shows is that they can balance on their bikes—something almost everyone can do.
It also shows that they aren’t in control of their bikes & all other road users should watch out for them. Such a childish attitude tells the motorist that the bicyclist hasn’t grown up yet.
Ride with both hands on the handle bars; you’ll be ready for emergencies.

Ignoring Stop Signs
Some bicycle riders think that stop signs & red lights are for somebody else. They want their rights to the road but won’t accept their duties.
Obey the traffic laws & all stop signs.

Riding Against Traffic
A common mistake made by many bicyclists, riding against traffic, may lead to accidents & traffic tickets. Over one-fifth of all vehicle/bike accidents are caused directly by wrong-way riders.
Ride with traffic. It’s the legal thing to do & it helps motorists see you. That reduces your chances of having an accident.

Riding With No Lights
There are many bicyclists out there riding at night without lights, & you may not see them until it’s too late.
They probably think that just because they are only going a few blocks, it’s OK. Unfortunately most vehicle/bike crashes happen within a few blocks of the bike rider’s home.
Get a good set of lights & reflectors or else walk your bike at night.

The Federal Emergency Management Agency released a residential training program to help familiarize residents in the various aspects of how large scale disasters will affect you and what you can do to help yourself, your neighbors and your Police and Fire Departments. We are very thankful to live in communities with excellent Safety Forces.

As seen on the news many times in recent years, major weather events and sudden acts of violence can temporarily overwhelm a community. This course makes you think about emergency planning steps to take for yourself and your family. It will help you understand the broad complexities of these events by introducing you to preparation already established in your community.

**EMERGENCY EDUCATION FOR RESIDENTS**

**Disaster Medical Operations - Part One / Wednesday, June 19th**
In this module you will learn about Life-Threatening Conditions and Triage. How to recognize and treat and airway obstruction, bleeding, and shock and the principles of triage and how to conduct triage evaluations.
_Instructor: Connie Skalsky_

**Disaster Medical Operations - Part Two / Wednesday, June 26th**
In this unit you will learn about Public Health Considerations - How to maintain hygiene and sanitation; Functions of Disaster Medical Operations - What the five major functions of disaster medical operations are and how they are set up; Disaster Medical Treatment Areas: How to establish them and what their functions are and Patient Evaluation - How to perform a head-to-toe assessment to identify and treat injuries. It includes Basic Treatment - How to treat burns, dress and bandage wounds, treat fractures, dislocations, sprains, and strains, treat hypothermia, treat heat-related injuries, control nasal bleeding and treat bites and stings.
_Instructors: Connie Skalsky & Elizabeth Sourek_

The need for residents to learn disaster medical operations is based on two assumptions: The number of victims could exceed the local capacity for treatment. Survivors will attempt to assist others. As CERT members you will need to know lifesaving first aid or post-disaster survival techniques. In a disaster there may be more victims than rescuers, and assistance from medical professionals may not be immediately available.

These classes are designed for the average, non-medical citizen!

**Sponsored by:**

YOU ARE WELCOME TO TAKE ANY CLASS YOU ARE INTERESTED IN AND ALL CLASSES ARE FREE!

The complete list of classes can be found at www.quadcitcert.org. Participants who attend all eight classes will receive a FEMA certificate of completion, a CERT starter duffle bag with some necessary items, and an Identification Badge.

All classes are held on evenings from 7:00-9:30 p.m. at the Independence Fire Dept., 6305 Selig Drive, 44131. Register by calling (216) 739-3702 or email to quadcitycert@cox.net. Include your name, address, city, and phone. Class sizes are limited - please register early!

HYDRANT FLUSHING
VILLAGE OF BROOKLYN HEIGHTS
JUNE 1, 2013 THROUGH JUNE 15, 2013
9:00AM TO 4:00PM DAILY

The Brooklyn Heights Fire Department will be flushing fire hydrants as an on-going program of hydrant and water maintenance. While hydrants are open, the homes on that block may experience discolored water or a drop in water pressure.

REASONS FOR TESTING

- To alleviate accumulation of mineral deposits within the water mains, thus reducing the incidence of discolored water.
- Preventative maintenance to make sure each hydrant is in top operating condition.

PRECAUTIONS TO TAKE

- Turn off any devices that automatically bring water into your home during flushing hours. Examples: Automatic ice makers, automatic yard sprinkling systems, etc.
- Avoid, if possible, running water. Examples: Doing laundry, Running bathwater, etc.

WHAT TO DO IF YOU HAVE DISCOLORED WATER

1. Wait one (1) hour after you are sure hydrant flushing is completed for the day.
2. DO NOT USE HOT WATER.
3. Run COLD water from whatever faucet is closest to wherever the water supply enters your house (typically in the basement) for approximately fifteen (15) minutes. It should clear up.
4. If problem continues, contact the Cleveland Water Department at:
   During Normal Business Hours M-F 8:00am-4:30pm (216) 664-3160
   All Other Times (216) 664-3060

WHEN WILL MY STREET BE FLUSHED?

- Signs are posted on the fire hydrants near the ends of the street one (1) day prior to flushing. For Example: Sign posted Tuesday afternoon indicates Wednesday flushing. Signs are removed after the street has been flushed.
- A daily listing of streets to be flushed can be found on the Brooklyn Heights Fire Department website at www.brooklynhnts.org
- Any questions please call the BHFD @ 351-3542

The Brooklyn Heights Fire Department’s primary responsibility is to emergency responses. Therefore, it is possible a street may not be flushed on its assigned day. Likewise, hydrant flushing will not take place if it is raining. In these instances, the signs will remain posted until flushing is completed.
