

South Street Water Main Replacement

Client:

Village of Brooklyn Heights

Client Contact:

Mayor Mike Procuik
345 Tuxedo Avenue
Brooklyn Heights, OH 44131

Location:

Brooklyn Heights, Ohio

Approximate Project Budget:

\$317,000

Start Date:

May, 2016

Completion Date:

August, 2016

The South Street Water Main Replacement was a project performed within the Village to maintain the aging infrastructure while utilizing funding from partners to maximize the Village's capital improvement fund. The project replaced the existing 6" water main with a new 8" water main and service connections along South Street. This replacement allows the water system to operate with improved pressures and flows and safety with the addition of two hydrants at the east and west end of the street. As part of this improvement the Village improved the asphalt pavement section and replaced the surface course to provide an improved driving surface. The total project cost was approximately \$317,000 and the Village's portion was \$83,000 or 26%.
